Professional Summary

Full stack engineer with over a decade of experience building enterprise web applications and eCommerce systems using PHP, Laravel, Magento 2 and Yii. Led a five-person healthcare engineering team and delivered API integrations, real-time communication and database performance improvements. Combines hands-on development with application architecture, code review and cloud deployment experience.

Technical Skills

Backend and eCommerce PHP, Laravel, Magento 2, Yii, Symfony, REST APIs, Node.js, NestJS

Frontend JavaScript, Angular 2-18, jQuery, HTML5, CSS3, Bootstrap

Data and Integrations MySQL, PostgreSQL, MongoDB, Redis, Twilio SDK, ArcGIS Maps

Cloud and Delivery AWS, Docker, Jenkins, Git, AWS SQS, WebSockets

Engineering Experience and Engagements

Legalshark.ca

Jan 2026 - Present

Lead Full Stack Architect and Developer

- Designed a modular application layer within a .NET/NOP platform to separate business logic, presentation and data access for legal case-management workflows.
- Built cross-layer APIs to support data isolation and maintainable communication between frontend and backend components.
- Extended framework capabilities through custom plugins, enabling new features without tightly coupling them to the core application.

Excelss Inc.

2022 - 2026

Senior Full Stack Engineer / Technical Lead

- Led and mentored a five-person engineering team delivering a nurse/client management platform using PHP, Laravel and jQuery.
- Implemented real-time chat with the Twilio SDK and improved communication behavior during peak traffic.
- Restructured API payloads and optimized database queries and indexes to improve application responsiveness and data retrieval.
- Integrated Buzz Communications and SurveyMonkey APIs into healthcare application workflows.
- Independently delivered a NestJS and Angular 18 subsystem alongside the PHP/Laravel platform.

Engineering Experience Continued

Codrain Technolabs Pvt. Ltd.

2019 - Dec 2025

Founder / Technology Lead

- Led technical discovery, estimation and delivery of custom web and mobile applications for international clients.
- Defined application architecture, reusable modules and engineering standards; reviewed code and supported delivery across multiple technology stacks.
- Designed AWS cloud environments and automated deployment approaches to support application reliability and scaling.

Credencys Solutions Inc.

2015 - 2019

Software Development and Architecture

- Worked across development, technical leadership and solution architecture responsibilities for enterprise and eCommerce applications.
- Evaluated requirements, designed system architecture and guided delivery teams on coding standards and Git workflows.
- Developed enterprise and eCommerce applications using PHP frameworks, MongoDB and REST APIs.
- Developed GIS-enabled municipal asset-management workflows using PHP Yii, REST APIs and ArcGIS Maps.

Selected Project Work

Rocking Carpets Customized Magento 2 checkout workflows and extension modules for an eCommerce application.

The Model Book Built calendar synchronization across user roles and bulk-import tooling for operational workflows.

HydroGeologic Connected a Node.js and Angular application to Python-driven data processing; used AWS SQS for background calculations and WebSockets with Highcharts for live dashboards.

Education and Recognition

Master of Computer Applications Gujarat Technological University | 2013 | 8.3 CPI

Bachelor of Computer Applications Bhavnagar University | 2010 | 72%

Corporate Innovation Hackathon winner (2016) | Behind the Scene Developer Award (2017)
